Summary

Software Engineer with one year of full-time experience building backend and full-stack applications using TypeScript, JavaScript, React.js, Node.js, NestJS and PostgreSQL. Hands-on experience with multi-tenant SaaS, REST APIs, gRPC, role-based access control, Redis caching and RabbitMQ background processing. Built an e-commerce platform and configured AI-powered automation using LLM APIs.

Technical Skills

Languages: TypeScript, JavaScript, SQL, C++, Python
Frontend: React.js, Angular, Next.js, Tailwind CSS
Backend: Node.js, NestJS, Express.js, REST APIs, WebSockets, gRPC
Data: PostgreSQL, MongoDB, Prisma, Supabase
Architecture: Microservices, API Gateway, multi-tenancy, role-based access control (RBAC)
Cloud and Tools: AWS S3, Azure, Oracle Cloud, Redis, RabbitMQ, Git, GitHub, Docker, Postman, Swagger
AI Tools: ChatGPT, Claude, Gemini, GitHub Copilot, Cursor, Perplexity
LLM APIs and Automation: Gemini API, Groq API, OpenRouter, LLM API routing, workflow automation

Experience

BeeLogical Software Solutions Oct 2025 – Present
Jr. Software Engineer | Pune

- Develop frontend and backend features for a multi-tenant coworking management SaaS platform supporting bookings, users and tenant-specific workflows.
- Develop and enhance React.js frontend modules, implementing UI and layout changes across platform workflows and integrating tenant-facing features with backend services.
- Implement and enhance role-based access control (RBAC) to manage permissions across platform roles and modules.
- Develop and maintain the User Management module for managing platform users and their role-based access.
- Implement direct client-to-S3 uploads using pre-signed URLs, avoiding routing file payloads through backend services.
- Integrate Redis caching across services to reduce repeated database queries for frequently accessed data.
- Implement asynchronous processing using RabbitMQ to separate background tasks from synchronous API requests.
- Investigate and resolve production defects across frontend and backend modules to address disruptions to platform workflows.

BeeLogical Software Solutions Jul 2025 – Oct 2025
Tech Intern - Full Stack Developer | Pune

- Designed and developed NestJS backend services using PostgreSQL for tenant-aware workflows in a multi-tenant SaaS platform.
- Built API Gateway, Authentication, Drive and Notification microservices as part of a distributed application architecture.
- Implemented service-to-service communication using gRPC within the microservices architecture.
- Built reusable Angular modules for employee directory, roles and permissions, Kanban and calendar workflows.
- Developed a configurable data table supporting filtering, sorting, pagination and row actions.

Colombo AI Aug 2024 – Dec 2024
Backend Developer Intern | Remote

- Developed a real-time chat messaging backend using Node.js, Express.js, WebSockets and MongoDB.
- Implemented APIs for Vibes/Story Repost features and collaborated with frontend developers on integration.

Education

International Institute of Information Technology (I2IT / ISquareIT), Pune
B.E. in Information Technology | 2021 – 2025 | CGPA: 8.4 / 10

Projects

BikersBrain - Full-Stack E-Commerce Platform Dec 2025 – Present
Live demo: www.bikersbrain.in
Technologies: React.js, Node.js, Express.js, PostgreSQL, Prisma, Supabase

- Built and deployed an e-commerce platform for two-wheeler spare parts and accessories, including customer shopping workflows and an admin dashboard.
- Developed product, inventory, order and user management workflows with authentication, backend APIs and database models.
- Integrated Razorpay payments, Cloudinary image delivery and Brevo transactional emails.
- Integrated Gemini to generate product details from product titles and implemented application deployment.

Hermes - AI Agent and Workflow Automation 2026 – Present
Technologies: Python, JavaScript, Node.js, Telegram, Oracle Cloud, Vercel, Linux

- Added routing across free LLM APIs to support AI tasks in Hermes.
- Connected Hermes to Telegram for chatting with the agent and sending task requests.
- Configured automation to generate and publish scheduled posts on X.
- Configured Naukri profile updates to run twice daily.
- Set up daily and on-demand email digests with the top five AI news updates.
- Deployed Hermes on an Oracle Cloud Ubuntu VPS and added a web dashboard to view schedules, run reports and server status.

XAUUSD Trading Automation - MetaTrader 5 Expert Advisor 2026 – Present
Technologies: MQL5, MetaTrader 5, Azure VPS

- Developed an Expert Advisor to execute a predefined XAUUSD trading strategy with automated position management and configurable lot and risk settings.
- Deployed the application on an Azure VPS and configured persistent remote execution and monitoring.

Achievements

- Rockstar Rookie 2025 award at BeeLogical Software Solutions for internship contributions.
- Solved 250+ coding problems across LeetCode and GeeksforGeeks.
- Completed the Full-Stack Web Development program from 100xDevs.
- Earned SQL (Basic) certification from HackerRank.
